WORK EXPERIENCE:

City of Hamilton **February '24 – August' 25**
GIS Data Analyst Hamilton, Canada

- Create, maintain, update, manipulate and analyze data in the City's corporate GIS database.
- Manage data on City's open data portal, adding new datasets and maintaining existing dataset with schedules updates.
- Complete spatial analysis and GIS application development projects with functional business units to assist in decision making and meeting operational needs.
- Assisted Enterprise specialist with publishing services to ArcGIS online platform and helped in maintaining those services.

Forestry Projects

- Developed and managed in-house projects for the forestry department, supporting field technicians with essential tools and resources.
- Coordinated and prepared all necessary materials and plans for arborists before the start of each season of planting and watering, ensuring smooth and efficient operations.
- Led a project on Spongy Moth Egg Masses, creating an innovative solution utilizing Field Smart forms and dashboards to enhance data collection and analysis.
- Conducted comprehensive assessments of woodlands, focusing on tree species identification and health evaluation to support conservation and management efforts.

GHD **April '22 – February'24**
GIS Analyst Waterloo, Canada

- Gather and compile geographic data from a variety of sources, including satellite imagery, aerial photographs, field observations and existing maps (verify the accuracy and reliability of collected data)
- Create and customize maps and visualizations using ArcMap, ArcPro, Adobe Illustrator to effectively communicate spatial information

Client Projects

- Actively contributed to several pivotal projects that played a significant role in fostering company growth and a noteworthy increase of 5% in client acquisition. Successfully led and contributed to remediation projects for US mining clients.
- Specialized expertise with (ER) initiatives, related to oil spills, derailments, and wildfires.
- Coordinated swift and effective responses to environmental emergencies, ensuring compliance with environmental standards.

Inhouse Projects

- Created an automatic FME (Feature Manipulation Engine) workspace to divide Excel sheet details based on new field data requirement in a systematic and professional approach used for all projects in field data collection.
- Created a diverse array of surveys utilizing Survey123 Connect, tailoring each to meet specific field data collection requirements, configured field maps by uploading essential layers to optimize functionality for field personnel. This integrated approach enhances efficiency and ensures a seamless experience for users conducting fieldwork through Survey123 Connect and field maps.

UTS Tree Care (Parks Canada) **October '21- April '22**
GIS Technician Uxbridge, Canada

- Worked on Hazardous tree risk assessment and prioritization Project for Parks Canada
- Used a Trimble Catalyst and Survey123, locate the Hazardous trees with the use of GPS
- Data collection with the use of Trimble Catalyst and fill up the information of the tree on field using ArcGIS
- Used ArcMap v10.8 produce various map with the location of hazardous trees on it.
- Used ArcMap v10.8 built a Map book
- Prioritization of trees based on condition and likelihood of involve in any hazard in future.

Master's Thesis Project

Natural Resource Canada **August'25 – May'26**
Vancouver, BC

- Conducted Individual Tree Segmentation (ITS) on airborne LiDAR point cloud data from Petawawa research forest using multi-temporal ALS datasets (three time periods)
- Implemented and compared multiple ITS algorithms (watershed, dalponte2016 and Li2012) to evaluated which algorithm works the best across time series.
- Documented code and workflows to support future reproducibility of the project.

EDUCATION:

Masters of Geomatics in Environmental Management **Jul'25 – May'26**
University of British Columbia Vancouver, BC

Geographic Information Systems (Certificate) **Sep '17- May '18**
Fleming college, Canada Lindsay, ON

Project Management **Sep '18- May '19**
Conestoga College, Canada Waterloo, ON

Bachelor of science in Geology **Jun '14- Jun '17**
Maharaja Sayajirao University India

SKILLS

- **Web technologies:** HTML5/CSS3, JavaScript, JSON, GeoJSON
- **Programming Language:** Python, R Studio
- **Databases:** SQL, Access, PostGIS
- **Development Methodologies:** Agile, Waterfall
- **Online data portal** – Google Maps, Leaflet and Mapbox
- **Tools:** ArcMap, Adobe Illustrator, FME, ArcMap pro, ArcSDE, ArcGIS suite, QGIS
- **MS Office:** Excel, Access, Outlook, PowerPoint
