PRITTY ARATTU

GIS PROFESSIONAL

Vancouver, BC, V6TIZ2 | **Cell:** +1(705)928 3789 | **Email:** pritty.arattu@gmail.com **LinkedIn:** https://www.linkedin.com/in/pritty-arattu-51b334149/ | **E-portfolio:** https://prittyarattu.github.io/E-Portfolio/

PROFILE

A passionate, focused geologist with the ability to channelize efficiency and provide work without compromising quality. Specialized in GIS application, with excellent communication and teamwork skills. Ability to reach out and network, to understand the need of the organization and deliver optimal results.

KEY COMPETENCIES

- Python, RStudio, HTML/CSS
- Agile and Waterfall development methodologies
- Public Engagement & Customer Service
- Organization and Administrative skills
- Microsoft Suite
- Adobe Illustrator, JavaScript, JSON, GeoJSON
- ArcGIS Suite, ArcSDE, FME
- AutoCAD
- Valid Ontario G driver's license

RELEVANT EXPERIENCE

2024-2025

GIS Analyst | City of Hamilton, Canada

- Create, maintain, update, manipulate and analyze data in the City's corporate GIS database.
- Manage data on City's open data portal, adding new datasets and maintaining existing dataset with schedules updates.
- Complete spatial analysis and GIS application development projects with functional business units to assist in decision making and meeting operational needs.
- Assisted Enterprise specialist with publishing services to ArcGIS online platform and helped in maintaining those services.

Forestry Projects

- Developed and managed in-house projects for the forestry department, supporting field technicians with essential tools and resources.
- Coordinated and prepared all necessary materials and plans for arborists before the start of each season of planting and watering, ensuring smooth and efficient operations.
- Led a project on Spongy Moth Egg Masses, creating an innovative solution utilizing Field Smart forms and dashboards to enhance data collection and analysis.
- Conducted comprehensive assessments of woodlands, focusing on tree species identification and health evaluation to support conservation and management efforts.

2022-2024

GIS Analyst | GHD, Canada

- Gather and compile geographic data from a variety of sources, including satellite imagery, aerial photographs, field observations and existing maps (verify the accuracy and reliability of collected data)
- Create and customize maps and visualizations using ArcMap, ArcPro, Adobe Illustrator to effectively communicate spatial information

Client Projects

- Actively contributed to several pivotal projects that played a significant role in fostering company growth and a noteworthy increase of 5% in client acquisition. Successfully led and contributed to remediation projects for US mining clients.
- Specialized expertise with (ER) initiatives, related to oil spills, derailments, and wildfires.
- Coordinated swift and effective responses to environmental emergencies, ensuring compliance with environmental standards.

Inhouse Projects

- Created an automatic FME (Feature Manipulation Engine) workspace to divide Excel sheet details based on new field data requirement in a systematic and professional approach used for all projects in field data collection.

2021-2022

GIS Technician | UTS Tree Care (Parks Canada)

- Worked on Hazardous tree risk assessment and prioritization Project for Parks Canada
- Used a Trimble Catalyst and Survey123, locate the Hazardous trees with the use of GPS
- Data collection with the use of Trimble Catalyst and fill up the information of the tree on field using ArcGIS
- Prioritization of trees based on condition and likelihood of involve in any hazard in future.

EDUCATION

2025-2026

Master of Geomatics in Environmental Management
Forest Sciences Centre, University of British Columbia, Vancouver, Canada

- FCOR599 (Project proposal development and Proof of Concept) – learnt how to develop, write, and deliver an effective project proposal.

2018-2019

Project Management (Post-grad Certificate)
Conestoga College, Ontario, Canada

2017-2018

Geographic Information System (Post-grad Certificate)
Sir Sandford Fleming College, Ontario, Canda

2014-2017

Bachelor of Science in Geology (B.Sc.)
Maharaja Sayajirao University of Baroda, India (CGPA: 3.56/4)

MEMBERSHIPS

- GIS Certification Institute (Employee Member)
- Go-Geomatics (Employee Member)

PROJECTS & PUBLICATIONS

2026

Thesis Research Project: Individual Tree Segmentation using Airborne LiDAR Data
Natural Resource Canada

- Conducted Individual Tree Segmentation (ITS) on airborne LiDAR point cloud data from Petawawa research forest using multi-temporal ALS datasets (three time periods)
- Implemented and compared multiple ITS algorithms (watershed, dalponte2016 and Li2012) to evaluated which algorithm works the best across time series.
- Documented code and workflows to support future reproducibility of the project.

DOI: TBD

2025

GEM500 – Kelp Habitat Mapping Project Proposal

- Project proposal exploring kelp habitat mapping using remote sensing and GIS analysis. The report outlines research objectives, methodology, and expected ecological applications.
