PRITTY ARATTU

GIS PROFESSIONAL

Vancouver, BC, V6TIZ2 | **Cell:** +1(705)928 3789 | **Email:** pritty.arattu@gmail.com
LinkedIn: https://www.linkedin.com/in/pritty-arattu-51b334149/ | **E-portfolio:** https://prittyarattu.github.io/E-Portfolio/

PROFILE

A GIS professional with a background in geology and over five years of experience developing GIS applications and spatial solutions. Skilled at translating complex spatial data into practical tools that support decision-making. Known for strong collaboration, clear communication, and delivering high-quality work that aligns with organizational needs.

KEY COMPETENCIES

- Python, RStudio, HTML/CSS
- Agile and Waterfall development methodologies
- Public Engagement & Customer Service
- Organization and Administrative skills
- Microsoft Suite
- Adobe Illustrator, JavaScript, JSON, GeoJSON
- ArcGIS Suite, ArcSDE, FME
- AutoCAD
- Valid Ontario G driver's license

RELEVANT EXPERIENCE

2024-2025

GIS Analyst | City of Hamilton, Canada

- Create, maintain, update, manipulate and analyze data in the City's corporate GIS database.
- Manage data on City's open data portal, adding new datasets and maintaining existing dataset with scheduled updates.
  Link to Open Data portal: https://open.hamilton.ca/search
- Complete spatial analysis and GIS application development projects with functional business units to assist in decision making and meeting operational needs.
  Link to all the web maps I created: https://open.hamilton.ca/pages/mapping
- Assisted Enterprise specialist with publishing services to ArcGIS online platform and helped in maintaining those services.

Forestry Projects

- Developed and managed in-house projects for the forestry department, supporting field technicians with essential tools and resources.
- Led a project on Spongy Moth Egg Masses, creating an innovative solution utilizing Field Smart forms and dashboards to enhance data collection and analysis.
- Conducted comprehensive assessments of woodlands, focusing on tree species identification and health evaluation to support conservation and management efforts.

2022-2024

GIS Analyst | GHD, Canada

- Gather and compile geographic data from a variety of sources, including satellite imagery, aerial photographs, field observations and existing maps (verify the accuracy and reliability of collected data)
- Create and customize maps and visualizations using ArcMap, ArcPro, Adobe Illustrator to effectively communicate spatial information

Client Projects

- Actively contributed to several pivotal projects that played a significant role in fostering company growth and a noteworthy increase of 5% in client acquisition. Successfully led and contributed to remediation projects for US mining clients.
- Specialized expertise with (ER) initiatives, related to oil spills, derailments, and wildfires.

Inhouse Projects

- Created an automatic FME (Feature Manipulation Engine) workspace to divide Excel sheet details based on new field data requirement in a systematic and professional approach used for all projects in field data collection.

2021-2022 **GIS Technician | UTS Tree Care (Parks Canada)**

- Worked on Hazardous tree risk assessment and prioritization Project for Parks Canada
- Used a Trimble Catalyst and Survey123, locate the Hazardous trees with the use of GPS
- Data collection with the use of Trimble Catalyst and fill up the information of the tree on field using ArcGIS

EDUCATION

2025-2026 **Master of Geomatics in Environmental Management**
Forest Sciences Centre, University of British Columbia, Vancouver, Canada

2018-2019 **Project Management (Post-grad Certificate)**
Conestoga College, Ontario, Canada

2017-2018 **Geographic Information System (Post-grad Certificate)**
Sir Sandford Fleming College, Ontario, Canada

2014-2017 **Bachelor of Science in Geology (B.Sc.)**
Maharaja Sayajirao University of Baroda, India (CGPA: 3.56/4)

MEMBERSHIPS

- GIS Certification Institute (Employee Member)
- Go-Geomatics (Employee Member)

PROJECTS & REPORTS

2026 **Thesis Research Project: Individual Tree Segmentation using Airborne LiDAR Data**
Natural Resource Canada

- Conducted Individual Tree Segmentation (ITS) on airborne LiDAR point cloud data from Petawawa research forest using multi-temporal ALS datasets (three time periods)
- Implemented and compared multiple ITS algorithms (watershed, dalponte2016 and Li2012) to evaluate which algorithm works the best across time series.
- Documented code and workflows to support future reproducibility of the project.

DOI: TBD

2025 **GEM500 – Kelp Habitat Mapping Project Proposal**

- Project proposal exploring kelp habitat mapping using remote sensing and GIS analysis. The report outlines research objectives, methodology, and expected ecological applications.
